

## **INTER-ROLLER ENGINEERING LIMITED**

Company Registration Number: 197900230M

### **PRESS RELEASE**

#### **SIGNING CEREMONY BETWEEN INTER-ROLLER AND WINNIPEG AIRPORTS AUTHORITY INC. ON 3 SEPTEMBER 2007**

Singapore, September 3, 2007 – Inter-Roller Engineering Limited (“Inter-Roller”) hosted a Signing cum Ribbon-Cutting Ceremony with Winnipeg Airports Authority Inc. on 3 September. This ceremony was held for the supply of S\$16.3 million Baggage Handling System (BHS) to Winnipeg James Armstrong Richardson International Airport. This turnkey contract consists of design, supply and installation of mechanical, electrical and control hardware. It also includes the integration with X-ray security screening machines.

Witnessing this ceremony were The Honorable Jim Rondeau, Minister of Competitiveness, Training and Trade, Minister of Science, Technology, Energy and Mines, from the Government of Manitoba, Canada, and Mr. Ted Tan, Deputy Chief Executive Officer, International Enterprise (IE) Singapore.

“This is the first time that Inter-Roller has tendered for a job in North America. We had to compete with other global players from America, New Zealand and Canada in their established market. Ultimately, our superior design, technical solution, system software and simulation stood out from the others. We are indeed honoured that Winnipeg Airports Authority has chosen us to be their partner in providing a world-class engineering solution for their baggage handling needs. We believe with this project, it will pave the way for more working opportunities in future,” said Mr. Lee Yeow Hwee, Senior Vice President (Americas).

Mr. Ted Tan said, “We are especially heartened that Inter-Roller has been awarded this contract by Winnipeg Airports Authority to provide baggage handling system at their airport in Canada. This is a further testament of Inter-Roller’s expertise and experience in being able to provide reliable and efficient baggage handling services at the various international airports it serves. IE is happy to have worked closely with Inter-Roller for this project in Canada. Though this would be Inter-Roller’s first project in Canada, we are confident that the success generated would encourage them to pursue other projects in Canada and North

America. This is in line with IE's objective to promote more Singapore companies to internationalise their operations overseas."

### **About Inter-Roller**

Inter-Roller is a world leader in the provision of airport logistics systems. The Singapore Main Board listed company specializes in the design, engineering, manufacture, installation and support of airport logistics systems comprising of Baggage Handling Systems, Air Cargo Handling Systems, and In-Flight Catering Systems.
