PRESS RELEASE

INTER-ROLLER WINS IN-FLIGHT CATERING PROJECT IN NEW DOHA INTERNATIONAL AIRPORT

SINGAPORE, 29 January 2008 – Inter-Roller Engineering Ltd (“the Company”) has successfully garnered a contract to design, supply and install in-flight catering system for the New Doha International Airport (NDIA). This is the Company’s second project for NDIA. The previous project won was for baggage handling.

This is also the Company’s second in-flight catering project in the Middle East after the Emirates Flight Catering.

The Company’s excellent track records and proven performance for past projects has helped won this project against strong competition from the European suppliers.

Slated for completion in 4th quarter 2009, this QAR 43 million (SGD 17 million) project will see a handling capacity of 82,000 meal sets a day to meet with the future demands of the new airport.

New Doha International Airport’s In-Flight Catering Facility is a fully automated system, with customized design to ensure a seamless transportation of delicate cutlery and meal sets at high speed across areas within the facility. This system is RFID-enabled and it consists of 1.2km of conveyers, high speed lifters, Automated Sorting and Retrieval System units and Transport Units, all inter-controlled and made possible by Inter-Roller’s High Level **Control Management System (CMS)** and **Store Management Control System (SMCS)**.

The Company’s in-flight catering systems can also be found at various airline catering centers located in the Asia Pacific region such as Singapore Airport Terminal Services (SATS), Korean Airlines, Emirates Flight Catering with handling capacity of 45,000, 37,000 and 115,000 meal sets a day respectively.

This project will further strengthen our position in the Middle East market and spearhead our efforts towards further expansion through our subsidiary, IR Middle East.

None of the directors has any interest, direct or indirect, in the above contract. The directors are not aware of any substantial shareholder having interest, direct or indirect, in the above mentioned contract.

About Inter-Roller

Inter-Roller is one of the world's leading companies in the provision of airport logistics systems with projects completed around the world. The Singapore Main Board listed company specializes in the design, engineering, manufacture, installation and support of airport logistics systems comprising of Baggage Handling System, Air Cargo Handling System, and In-Flight Catering System. Inter-Roller is headquartered in Singapore and has subsidiaries in Malaysia, China, the Middle East and United Kingdom.

About NDIA

The new airport, which has been described as "a small city within a city" will house a business park, a free trade zone, and a 3-storey terminal building with dedicated retail space and hotel facilities. Designed for a capacity of 24 million passengers a year, NDIA will be one of the largest airports in the Middle East.
