AZTECH UNLEASHES SKYPE PRODUCTS AT CHINA SOURCING FAIR & HONG KONG ELECTRONIC FAIR (AUTUMN 2006)

SINGAPORE, 11th October 2006 – Singapore Exchange Mainboard listed, Aztech Systems Ltd (“Aztech”), a global leader in voice and data communications, multimedia, contract manufacturing and retail distribution, unleashes its latest range of Skype products at China Sourcing Fair and Hong Kong Electronic Fair this month. Both shows are held twice yearly and receive commendable visitorship from all corners of the globe especially South East Asia.

Aztech’s primary focus is to showcase its latest suite of Skype products that include its world’s 1st premiere of a DECT (digital enhanced cordless phone) that does not require a computer connection to run Skype. The V500DS, PC-Free, embedded Skype is truly the next generation Skype DECT that redefines mobility while providing both Skype and traditional phone functionality in one cordless handset.

Venue : Hong Kong Convention and Exhibition Center
Date : 13 to 16th October 2006
Aztech booth : Hall 5, 5G29

Product highlights

Aztech PC-Free Embedded Skype - V500DS

The new Aztech V500DS-S1 is Skype DECT phone that allows users to access Skype network without even turning on the PC. The phone automatically provides most of the Skype features such as Voicemail, call forwarding and Skype-In / Skype-Out services. Without having to use a PC or laptop, the user can view their Skype contact’s status and profile, and can also add/search their Skype friends directly through the 1.5” color handset screen on the product. Providing a hassle-free experience, there are separate call lists for both PSTN and Skype Calls for dual mode convenience. The Base is capable of registering up to 4 handsets for Intercom calls.

Aztech Skype DECT - HS315-S1

Aztech Skype DECT phone with USB Dongle **HS315-S1** is a dual-mode phone that allows users to make both Skype and PSTN calls on the same handset. Aztech's Skype phone's innovative design with the USB dongle attached on the PC allows users to place the DECT phone away from the computer up to 50 meters long. The DECT communications with the dongle wirelessly, removing the hassle of cables. The Skype user list is clearly displayed on the 1.5" colour LCD on the handset. Users just have to scroll up and down the buddy list, push the "Talk" button and straight away be able to make a Skype call. The DECT handset is loaded with features. The Graphical User Interface (GUI) allows users to operate the phone with ease. It also has handsfree speakerphone, blue keypad backlight and 9 polyphonic ring tones on the handset for the user selection. It also registers up to 4 handsets to the base-station.

Aztech HomePlug 85Mbps Wireless G LAN Extender

Aztech **HL105EW** HomePlug 85Mbps Wireless LAN Extender uses HomePlug1.0 Turbo 85Mbps to transform in-house power circuit to extend the Wireless LAN coverage. It resolves common issues of blind spots or thick walls faced by many Wireless LAN users. When plugged into the power socket and used in conjunction with another connected HomePlug 85Mbps Ethernet Adaptor that is linked to the ADSL or Cable Modem, it enables home/SOHO users to conveniently position the HomePlug Wireless LAN Extender at the most appropriate location in the premises. It provides tight security features via 56bit DES encryption on the power circuit and 64/128 Bit WEP and WPA Encryption on Wireless LAN. The wireless settings are easily configured on the PC using the supplied installation wizard.

Aztech IP150 IP phone for small/medium enterprises

The new IP150 is all about user friendliness and security. Six free, user- or administrator-configurable (or carrier-reconfigurable) function keys can easily be allocated to security-related menu functions, or assigned to multiple lines. The Aztech IP150 comes factory-equipped so that two of its six programmable keys can be configured as line appearances, and upgrades are available that lets you configure (up to) all six function keys this way - flexible enough to suit the needs of every user.

With the support of Secure SIP/RTP ensures protection against Internet telephony security flaws such as eavesdropping and provides the ideal platform for ITSP as an end terminal for the IP Centrex service office.

In addition, the Aztech IP150 offers all necessary office functionality, e.g. choice of trunk line, status indicator, group lines, busy option and call-pickup. High audio quality, ease of use and interoperability make the IP150 highly suitable for SMEs, home offices, private users or ISP applications.
