

AZTECH AWARDED PRESTIGIOUS TS 16949 QUALITY CERTIFICATION FOR AUTOMOTIVE INDUSTRY

Singapore, 05 May 2008 – Aztech Systems Ltd (“Aztech”) today announced that it has received the prestigious TS 16949 certification, which qualified its design and manufacturing processes for the automotive sector.

As the highest level of quality excellence, the TS 16949 certification specifies quality system requirements for manufacturers in the international automotive industry. Today, the TS 16949 certification is a key parameter in vendor selection process and widely used on a global basis for automotive quality systems. The scope of the certification for Aztech was on the design and manufacture of printed circuit board and box build assemblies. Its requirements included continual quality process improvement and customer satisfaction measurements.

Aztech’s bid to be TS 16949-certified was driven by demand from existing customers. With the new certification, the Group is also better positioned in bidding new business opportunities from global auto manufacturers and suppliers. Aztech has also previously achieved certification to ISO 9001: 2000 and the TL 9000 standards.

The process of getting certified has also improved and fine-tuned the processes in Aztech’s plant in Dong Guan China, resulting in an elevated quality of design and manufacturing services for all customers. The award affirmed the readiness and high quality of Aztech’s stringent manufacturing processes for other highly demanding industries.

Aztech

Michael Mun, CEO & Chairman of Aztech Systems says, "We are proud to have attained this milestone because it is another important step in the Group's strategy in providing 1st class manufacturing while improving efficiencies in today's challenging business environment. As we look for new areas of expansion with our recent business diversification, we are constantly looking for ways to strengthen and achieve continuous progress in our core business. With the award and our vertically integrated plant in Dong Guan, we are confident that there will be more opportunities to market and enhance our services to an even wider range of customers. "
